

# HYDRO-SILK-FLUID

In addition to valuable oils, this ultra-light fluid also provides the skin with Oligogeline® Algae extract, which prevents dehydration, and the wonderful Silk-Gel, vegan, which provides the skin with a breathable protective film. It is immediately absorbed by the skin and leaves a silky, well-groomed feeling.

## Ingredients 100g

A)

7,50g Argan oil  
4,00g Jojoba oil  
1,50g Sheabutter  
1,50g Oatseed oil  
0,50g Phytosterol Macadamiate  
2,00g Emulwitor 375  
1,00g Phospholipon® 80H

01

Heat Argan, Jojoba oil and Phospholipon® 80H to 80°C until everything has dissolved. Then reduce the heat and at 60°C add the remaining ingredients from phase A).

B)

69,50g Water or Hydrolat  
2,00g Glycerin  
1,50g Sodium PCA  
3,00g Silk-Gel, vegan  
2,00g Oligoline® PF  
1,50g Natriumlaktat  
1,00g Vitamin-E-acetate  
0,20g Hyaluronic acid

02

Simultaneously heat phase B) to 60°C and then join the two phases and homogenize at high speed.

C)

0,30g Xanthan  
transparent/Cosphaderm® X34  
1,00g Conservator

03

For hand-warming with xanthan gum, adjust the consistency and add the preserver. If the skin is prone to tension, adjust the pH-value with 1-2 drops of lactic acid to below 5.

This is just a recipe proposal.

By exchanging oils and active ingredients you create your own fluid.
