

Natural Deo-Roll-On (50ml)

This simple formula of a deodorant roll-on gives you a safe feeling...all day long. ImerCare 400D ensures sweat-free underarms and Biokons PA30 inhibits growth and the proliferation of odour-causing substances. The skin is not irritated in any way and remains pleasantly dry and soft. The light floral fragrance of Biokons PA30 means that there is no need for further perfuming with essential or perfume oils.

Ingredients

Phase A)

- 37,70g Water
- 0,75g Glycerin
- 0,75g Pentylene Glycol natural
- 0,05g Amaze®

Phase B)

- 1,25g PolyAqual®-2W
- 7,50g Ester oil

Phase C)

- 1,00g ImerCare 400D
- 0,25g Vitamin E Acetates
- 0,75g Biokons PA30

How to do:

Heat the water phase and then stir in Amaze® XT at high speed. Heat the phases A) and B) separated to 70-75°C.

Add water to the fat phase and homogenise at high speed.

Add ImerCare 400D and stir again at high speed.

Add vitamin E acetates and Biokons PA30 at 30-35°C.

Check pH value. It should be between 6.5 and 7.0.

Correct with lactic acid if necessary.

Fill into a roll-on bottle and you have a mild, delicately scented deodorant that works effectively and does not irritate the skin.
