

CLEANING FOAM

Matching our Foamer bottles a recipe for a extra mild cleansing foam. This is perfect for normal to combination skin.

Ingredients 100ml

0,01g Peppermint ÄÖ ÄÖ
0,03g Solubilize G 10 LW 70 MB
4,00g Solve 61
0,20g Rose hip seed CO2 extract

01

First mix the rosehip CO2 extract with Solve 61. This oil should not cloud the formulation later. Also mix the perfume with the solubilizer.

A)
79,06g Water
2,00g Plantapon® SF
3,00g Surfalux Ultra Mild
1,00g Disodium/Sodium Cocoyl
Glumate
4,00g Glycerine
1,00g Sodium lactate
2,00g Sodium bicarbonate

02

Now mix phase A and phase B separately. (by hand, not with the mixing rod - this gives too much foam).

B)
1,50g Blend TBG
0,50g D-Panthenol
0,10g Allantoin
0,50g Spirit of Wine
1,00g Urea
0,10g Natron

03

In phase B, the allantoin, the sodium bicarbonate and the urea are supposed to dissolve. Here we go: Now gently stir phase B into phase A and then add the rest.

Check pH value and adjust to 5-5.5 with lactic acid if necessary.
